

Wiem Boubakri

Full-Stack and DevOps Engineer

Sousse, Tunisia · boubakri.ict@gmail.com · +216 52 370 702 · <https://github.com/wiembk> · <https://wiembk.github.io>

Summary

Full-stack and DevOps engineer on Wamia, a multi-vendor marketplace in French, Arabic, and English. Builds Magento 2 modules, a React seller dashboard, and a React Native shopper app, and deploys them: Magento on Google Compute Engine, the dashboard with Docker on Cloud Run, and mobile with Expo to TestFlight, the App Store, and Google Play. Started with AWS CloudFormation and Bash. Now uses Docker, Terraform, Cloudflare, Google Cloud, and GitLab CI on a production system.

Experience

Full-Stack and DevOps Engineer, Wamia

Sousse, Tunisia · October 2024 - Present

- October 2024 - May 2025. Built the React and TypeScript seller dashboard in French, English, and Arabic for products, inventory, orders, invoices, finance, and analytics. GitLab CI builds a Docker image and deploys it to Cloud Run. Magento GraphQL stays on a Compute Engine virtual machine.
- May 2025 - August 2025. Shipped Seller Pause in Magento and React, and Meta Catalog Sync from Magento to Meta. Wrote the migration plan off the legacy marketplace.
- 2025 - 2026. Shipped the React Native shopper app with Expo and EAS Build. iOS goes to TestFlight for the team, then the App Store. Android ships to Google Play as an App Bundle.
- September 2025 - Present. Refactored Magento across the storefront, backend, and infrastructure. Improved database performance and category pages. Led the Store modules that replace the legacy marketplace: catalog, orders, commissions, finance, promotions, discounts, reviews, and refunds, with an admin UI and GraphQL.
- 2026. Operate production Magento on Compute Engine with Nginx, Varnish, PHP-FPM, and MariaDB. Handled site-wide 503 responses, PHP-FPM out-of-memory crashes, and disk fill from container logs. Added Cloudflare Turnstile. Upgraded to Magento 2.4.8 and PHP 8.3. Started the TypeScript platform: NestJS, Next.js, scoped roles, MFA, and Terraform on Cloud Run.

Software Engineer and DevOps Engineer, OBG

January 2023 - October 2024

- Built APIs integrating Magento with Odoo for inventory, orders, and sales, and a commission calculation module for seller products.
- Deployed Odoo with Docker Compose and Nginx, DNS, and TLS using Certbot. Built a Flask API to manage Dockerized Odoo instances, with multi-region backups.
- Ran GitLab workflows, staging environments, Elasticsearch, and MariaDB across Google Cloud and AWS.

Projects

Infrastructure as Code and Magento Deployment

ENET'Com · 2023 · <https://github.com/wiembk/magento-IAC> · <https://github.com/wiembk/magento-ec2>

- Designed an AWS architecture in CloudFormation in eu-central-1 across two availability zones: VPC, public and private subnets, NAT, security groups, Application Load Balancer, Auto Scaling, Aurora MySQL, Elasticsearch, ElastiCache Redis, and S3.
- Automated Magento 2.4.3 installation with Bash on EC2. The script reads CloudFormation exports and connects the shop to Aurora, Elasticsearch, Redis, and the load balancer.
- Wrote a cost and performance reading of the design against projected traffic.

Education

Engineering Degree, Network and Cloud Infrastructure

ENET'Com, Sfax · 2020 - 2023

Preparatory Class, Mathematics and Physics

ESSTHS, Sousse · 2018 - 2020

Skills

Programming: PHP, JavaScript, TypeScript, Python, Bash

Frontend: React, Next.js, React Native, Expo

Backend: Magento 2, GraphQL, REST APIs, NestJS, Odoo

DevOps: Docker, Nginx, Varnish, GitLab CI/CD, GitHub Actions, Terraform, CloudFormation, Linux, SSL/TLS, DNS, SSH

Cloud: Google Cloud (Compute Engine, Cloud Run, Cloud SQL, Cloud Storage), AWS (VPC, EC2, RDS, S3, Application Load Balancer, ElastiCache), Cloudflare

Databases: MySQL, MariaDB, PostgreSQL, Redis, Elasticsearch

Certifications

- AWS Certified Cloud Practitioner
- DevOps on AWS Specialization
- Cloud Operations on AWS
- Azure Fundamentals
- Introduction to Programming Using Python
- Introduction to Git and GitHub
- Introduction to Network Automation
- Crash Course on Python
- IBM Full Stack Software Developer Professional Certificate (in progress)

Languages

English, C1. French, B1.
